

★ Flex Grid:-

In this, we can specify rows & columns.

→ Grid-template-columns: 100px . .

→ Grid-template-rows: 100px . .

where rows will specify height and
columns will specify width.

→ Grid-template-columns: repeat (no. of times, size)

Grid-template-rows: repeat (" , ")

where repeat (no. of times, size)

this can only be used when "it
has equal size."

→ gap: 10px 10px

where gap = row-gap column gap.
